

The Children of Neverland, *The Silent Human Disaster*

Dr. Gideon Koren
The Kid in US Publications, 1997

Supported by authoritative facts and figures, the *Children of Neverland* is a compelling account of Dr. Koren's personal experience as a pediatrician and researcher. In it he describes how the damage inflicted upon unborn children and infants by drugs, environmental chemicals, illness and poverty, can be prevented through education, counseling and research.

"Neverland, in the context of this book, is the place where many children will reside permanently, unable to reach their full potential. But unlike Peter Pan's legendary, hidden land, there is neither legend nor hiding here. The damage inflicted on these children during fetal life or soon after birth will remind them throughout their long journey that they have been locked out."

Dr. Gideon Koren

In *Children of Neverland* you will read about --

Medicinal drugs that cause malformations
The fetal risks of cocaine
The long-term effects of prematurity
Alcohol and its fetal risks
Maternal infections that can damage the unborn baby
The Chinese version of a holocaust
Environmental chemicals that can put the unborn at risk
The HIV virus in pregnancy
The devastating impact of child abuse
The fetus as a passive smoker
Sudden Infant Death Syndrome
Adolescent suicide
Drug errors that can kill young children
